

# **Southern California Pipeliners Organization**

California State Fire Marshal's  
Conference 2006

# Southern California Pipeliners Organization (SCPO)

- Robyn Lopez Kinder Morgan- President
- Cam Movafagian Pacific Treasurer Pro-tem
- Jim Hosler Pacific Vice President.
- Leak Wheel Administrator 2000-2004

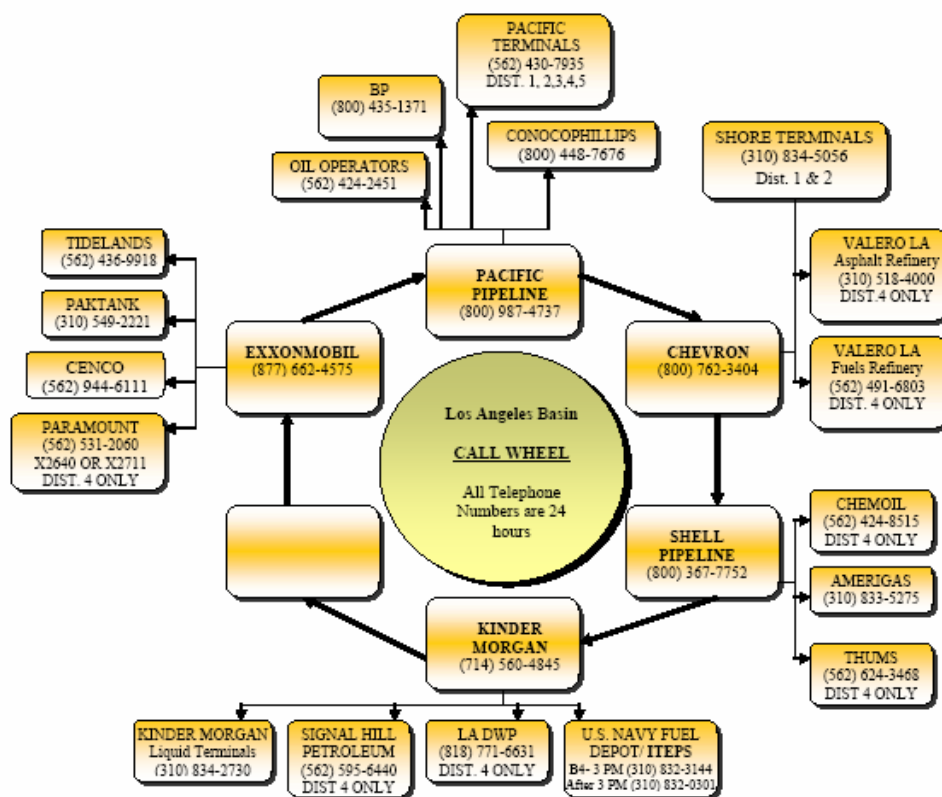

# Southern California Pipeliners Organization (SCPO)

- Began in May of 1956 with the meeting of the LA area Chief Dispatchers.
- October 25 1956 First regular meeting held “Petroleum Pipeline Chief Dispatchers Organization”.
- October 1 1958 the Thomas Guide was adopted as the official release reporting reference and the districting was provided.
- March 5, 1969 The minutes of the Pipeline Committee of the Western Oil & Gas Association reflect concerns over pipeline leaks- Notification and Emergency Action. This document launches what we now call the Leak Wheel.

# Southern California Pipeliners Organization (SCPO)

- March 30, 1992 The name of the organization was changed “Southern California Pipeline Organization” (SCPO)
- 1999 Satellite Service used for notifications
- 2004 Pager and Meeting Phone number established.
- 2004 Web page active [www.socalpo.org](http://www.socalpo.org)

## SOUTHERN CALIFORNIA PIPELINE ORGANIZATION

### **PURPOSE OF THE CALL WHEEL**

The "Call Wheel" is for leak information notification to companies on the Call Wheel and response information on who claimed the leak.

### **HOW TO USE THE CALL WHEEL**

The companies in the inner wheel of the Call Wheel connect using a nationwide pager and a dial-in conference line. Any company within the inner wheel that becomes aware of a leak may be connected simultaneously with the other companies on the inner wheel. (A satellite company that becomes aware of a leak should contact the inner wheel company to initiate the Call Wheel.) Upon initiating the Call Wheel, take roll call and then pass on the leak information. If any company on the inner wheel is absent for roll call, the company immediately prior to the absent party will call the absent company via the public telephone system. In the event a company on the inner wheel can not be contacted, the company immediately prior to the absent party will call the satellite company that the absent party was supposed to contact. In the event that any of the inner wheel companies are unable to contact any of their satellite companies, this information will be passed back to the inner wheel companies.

### **IF THE WHEEL COMMUNICATIONS FAIL**

In the event the nationwide pager does not work, revert to individual telephone calls as indicated on the Call Wheel. The initiating company will call the next party in the Call Wheel sequence. If any of the companies on the inner wheel can not be contacted, the party immediately prior to the absent party will notify the next party on the inner wheel in sequence after the absent party. The party immediately prior to the absent party will also be responsible for calling the satellites of the absent party.

In the event of a phone number change, please contact the Jim Hosler at Pacific Pipeline System as soon as possible at 562-728-2327.

# THE END
